

Renewed Model Names & Labels

Commercial, industrial and seawater RO elements

HOW TO READ A NEW NAME

✓ Same elements, new names.

Published ratings and dimensions are unchanged. The name now states the feed spacer.

✓ Three names split by spacer.

BW30-365, BW30-400, TMBW30-400 now come as 28 mil and 34 mil versions with the same published ratings. The 34 mil spacer is designed for feeds with higher fouling potential.

✓ Residential names unchanged.

RE, ES, HR, TW-3012 and TW-3013 keep their names. Renewed labels are already shipping.
